COMMERCIAL PROJECTS

Velosaty | Velosaty.com | **ROLE:** FRONTEND DEVELOPER   May 2023 – Present

A web application that helps collegiate athletes find mentors to further develop towards their career goals.

Tech: React, Next.js, TailwindCSS, Node.js, Figma, MongoDB, AWS Cloud, ESLint, Trello.

- Developed responsive and reusable React components, ensuring responsive design and adherence to Figma specifications.
- Collaborated with cross-functional teams to rapidly prototype and validate product ideas.
- Organized and assigned tasks on the project Trello board to ensure efficient workflow, timely completion of deliverables, and clear communication among team members.
- Developed and implemented A/B testing interfaces, leveraging data collection to inform and optimize product decisions

Telosys Group | **ROLE:** FRONTEND DEVELOPER   June 2023 – September 2024

A web application that helps users find ethical and socially responsible companies and discounts through the assistance of an AI chatbot.

Tech: React, Next.js, SASS, React Testing Library, Cypress, Node.js, Open AI API

- Mentored new frontend engineers by providing onboarding support, code reviews with constructive feedback, and guidance on responsive SCSS styling best practices, fostering a collaborative learning environment.
- Participated in the Agile process using Scrum methodology in a fast-paced development environment.
- Developed reusable and maintainable React UI components for an AI assistant that empowers users to discover and support socially responsible businesses.
- Engineered an AI-powered chatbot using the OpenAI API with long context windows to parse data and deliver accurate information to users
- Worked with Node.js for backend development and integrated APIs to enhance chatbot functionality
